Total Nitrogen	6.0%
0.9% Water Soluble Nitrogen	
5.1% Water Insoluble Nitrogen	
Available Phosphate (P ₂ O ₅)	2.0%
Soluble Potash (K ₂ O)	6.0%
Calcium (Ca)	5.00%
Chlorine (Cl) Not More Than	1.00%
Iron (Fe)	0.20%

DERIVED FROM:

Composted Poultry manure and feather meal, sulfate of potash - Also Contains 5% Humate

5.1% slowly available water insoluble Nitrogen from poultry manure and feather meal

Iron (Fe) is an essential plant nutrient that aids in plant color, however, it will stain sidewalks, driveways, patios, pavers, concrete lawn ornaments, and other concrete surfaces. Please use caution around these items.

Should the fertilizer come into contact with them, USE A BROOM OR BLOWER TO CLEAN THE SURFACE TO PREVENT STAINING - DO NOT WASH THE PRODUCT FROM SIDEWALKS OR DRIVEWAYS.

Rate Notes:

- These rates are provided as a guide only.
- Be sure to calibrate your spreader, to calibrate your spreader correctly, please see the **Spreader Calibration** section
- Specific rates will vary by region, soil type, and performance requirements.
- For St. Augustine & Centipede grass use the Low to Medium rate
- For Bermuda grass use the High to Medium rate.
- Spread rates below 4#s per 1,000 (175# per Acre) can result in poor coverage.

Spreader Calibration:

Below are some guidelines to ensure the application rate is correct.

- Set the spreader so that the openings in the bottom are 1/4 to 1/2 open, when engaged.

- Pour 6.25LBS (25% of the bag) into the spreader.
- Apply all the fertilizer to an area (squares or rectangles work best).

• Calculate the area of the treated lawn by measuring the length and width. You should have covered between 750 and 375 square feet.

- If the treated was LESS than this range, then DECREASE the size of the openings in the spreader, and recalculate starting at step 2 on a new unfertilized area.
- If the treated area was MORE than this range, then INCREASE the size of the openings in the spreader, and recalculate starting at step 2 on a new unfertilized area.

General Information:

- After application, water in with a minimum of 0.15" of rain or irrigation.
- Do not collect clippings for at least the first mowing, following application.

This Product will Provide
Fertilizer for up to:

1-2 Months

Caution

- Keep out of the reach of
- Harmful if swallowed
- This product must be stored under cool & dry conditions.
- Do not apply if heavy rain is expected.
- Remove any product that lands on the driveway, sidewalk, or street
- Fill spreader on a flat surface so spilled fertilizer can be cleaned.

This fertilizer also contains the following
non-Plant Food Ingredients

5% Humate

Contains 11.3 Million Total Bacillus Bacteria Colony Forming Units (CFU's) per Lb.

Contains 72.57 Total Mycorrhizae / Endomycorrhiza Propagules per Lb.

Contains 1.13 million total Trichoderma Colony Forming Units (CFU's) per Lb.
